

WHOLENESS SUPPORT UNIT (WSU V4 Pod)

Basic Information

The three towers with their Life Force Energy core power emitters set up a Life Force Information Field that is more focused than in a normal environment. The fields also contain qualities and information imparted by the Transition State Elements (TSE) that the core emitters have been coated with.

When you sit in the space between the towers these information fields will flow to find balance with your own field, and in this way they can add information that you need, and remove imbalance, or information, that is not naturally a part of the original you. It is a bit like reaching neutral pH again.

[See User Guide](#)

[See User Experiences](#)

The three towers are adjustable so that the heights can be set to suit the setting of a bed or chair. They are made of high quality acrylic.

The Life Force Energy emitters in each tower carry a blend of information fields, which together build a field strength gradient relative to each other, enabling a dynamic flow of fields. The reference field set up by all 3 towers' emitters will then respond to the need of the body sitting in the centre.
